SUMMARY

Computer Science graduate with hands-on experience in full-stack web development, software development, cloud technologies, and database management. Skilled in React.js, Node.js, JavaScript, Python, SQL, and Google Cloud Platform (GCP), with a strong interest in designing, developing, and deploying efficient, scalable, and user-friendly software solutions.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, SQL, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Firebase
Cloud & DevOps: Google Cloud Platform (GCP), AWS, CI/CD, Networking
Databases: MongoDB, MySQL, Firebase Realtime Database
Tools: Git, GitHub, Figma, REST APIs, Agile Development
Concepts: Development, IoT Systems, Machine Learning

EDUCATION

RNS Institute of Technology, Bengaluru 2022 – 2026
Bachelor of Engineering – Computer Science & Engineering CGPA: 8.22 / 10

EXPERIENCE

Unified Mentor | IT / Software Mar 2026 – May 2026
Full Stack Web Developer Remote

- Developed responsive web applications using HTML, CSS, JavaScript, React.js, and Node.js.
- Built full-stack applications by integrating frontend, backend, and MongoDB database.

PROJECTS

Sensor-Based Waste Management System with AI Prediction | *IoT, Flask, Firebase* Feb 2025 - Jun 2025

- Designed and deployed an IoT monitoring system enabling real-time waste level tracking across multiple sensor locations.
- Developed a machine learning model achieving 85% prediction accuracy for waste collection forecasting.
- Built a Flask and Firebase dashboard providing live analytics and reducing report generation time significantly.

Hospital Management System - MERN Stack | *HTML, CSS, JavaScript, React.js, Node.js* May 2026 – Jul 2026

- Built a full-stack Hospital Management System using MongoDB, Express.js, React, and Node.js.
- Developed role-based dashboards for Admin, Doctor, Receptionist, and Patient.
- Implemented patient registration, appointment booking, prescription management, and billing modules.

AeroWeather – Weather Forecast Dashboard | *HTML, CSS, JavaScript, Python, Flask, OpenWeather API*

- Developed a responsive weather forecasting dashboard using Flask, HTML, CSS, JavaScript, and Python to deliver real-time weather information.
- Integrated the OpenWeather API to retrieve and display current weather conditions, 24-hour forecasts, and 7-day weather outlooks.
- Implemented a Flask backend to process API requests, manage weather data, and provide deterministic mock data when live API access was unavailable.

CERTIFICATIONS

- **Data Structures and Algorithms** – Score: 100/100 (Dec 2026)
- **Google Cloud Platform (GCP) Cloud Engineer Track** – Score: 100/100 (August 2025)
- **AI-Driven Content Mastery for Marketers** – Edutainer (May 2026)
